LOCAL FALLBACK

Founder Inputs

Industry:	Healthcare
Target Audience:	Nonprofits
Goal:	drive sales
Budget (\$):	500
Team Size:	4
Max Days:	14

Agreement

- Both outputs use the founder constraints: budget 500, team size 4, max days 14.
- Both outputs recommend the 'marketing_ready' path.

Differences

No major differences detected.

Roadmap

Marketing execution - This week

Actions:

- Run Campus Interviews
- Run Reddit/Forum Engagement
- Run Beta Waitlist Campaign

Success Metrics:

- Measure replies, signups, clicks, or interviews booked.
- Compare cost and time spent against evidence quality.

AI Recommendations

Marketing

Campus Interviews (score: 0.8)

Direct conversations with real students give the clearest signal about whether the problem is real, at almost no cost - before spending anything on ads.

Reddit/Forum Engagement (score: 0.7128)

Reddit communities are brutally honest - if your solution is genuinely useful, you'll know fast. If it's not, you'll know even faster.

Beta Waitlist Campaign (score: 0.6714)

A waitlist with 0 sign-ups is devastating but honest - it tells you people don't care before you spend months building.

Risks

- This fallback does not include independent AI reasoning.
- Use Hugging Face before final founder-facing recommendations.

Founder Report

LaunchPilot Analysis

Brand score: 63.7/100. Threshold: 60/100.

The deterministic engine selected 'marketing_ready'. The AI output selected 'marketing_ready'. The founder should prioritize the roadmap above because it respects hard constraints first, then uses AI reasoning to explain tradeoffs and next actions.
